To Whom It May Concern:

I am writing to support the current language in the proposed changes to the State of Utah antidegradation rules. The requirement of a Level 2 should only be imposed when new facilities are being built or existing facilities are undergoing a significant upgrade which includes increasing its overall facility capacity. POTW's must be allowed to grow within their design capacity without ongoing reviews. It is accepted that this would not be the case when water quality standards are being impacted or new standards are established. Again, I support the proposed rule as a reasonable alternative.
